

PEARのパッケージ一覧

2013.12.27現在のALL PACKAGES [CHANNEL PEAR.PHP.NET]

作成: 2013.12.27 CXMedia Inc.

No	PACKAGE	LATEST	LOCAL	Description	Check
1	pear/Archive_Tar	1.3.11	1.3.11	Tar file management class	
2	pear/Archive_Zip	0.1.2		Zip file archiving management class	
3	pear/AsteriskManager			Control an Asterisk PBX server from PHP	
4	pear/Auth	1.6.4	1.6.4	Creating an authentication system.	
5	pear/Auth_HTTP	2.1.8		HTTP authentication	
6	pear/Auth_PrefManager	1.2.2		Preferences management class	
7	pear/Auth_PrefManager2	2.0.0dev1		Preferences management class	
8	pear/Auth_RADIUS	1.0.7	1.0.7	Wrapper Classes for the RADIUS PECL	
9	pear/Auth_SASL	1.0.6	1.0.6	Abstraction of various SASL mechanism responses	
10	pear/Auth_SASL2	0.1.0		Abstraction of various SASL mechanism responses. Rewritten to take advantage of PHP5 style & syntax	
11	pear/Benchmark	1.2.9		Framework to benchmark PHP scripts or function calls.	
12	pear/Cache	1.5.6		Framework for caching of arbitrary data.	
13	pear/Cache_Lite	1.7.15	1.7.15	Fast and Safe little cache system	
14	pear/Calendar	0.5.5		A package for building Calendar data structures (irrespective of output)	
15	pear/CodeGen	1.0.7		Tool to create Code generators that operate on XML descriptions	
16	pear/CodeGen_MySQL	1.0.0RC1		Abstract base package for MySQL code generators	
17	pear/CodeGen_MySQL_Plugin	0.9.2		Tool to generate MySQL Pugins from an XML description	
18	pear/CodeGen_MySQL_UDF	1.0.0RC1		Tool to generate MySQL UDF extensions from an XML description	
19	pear/CodeGen_Pecl	1.1.3		Tool to generate PECL extensions from an XML description	
20	pear/Config	1.10.12		Your configuration's swiss-army knife.	
21	pear/Config_Lite	0.2.1		a lightweight and fast Config class for ini style text configuration files.	
22	pear/Console_Color	1.0.3		This Class allows you to easily use ANSI console colors in your application.	
23	pear/Console_Color2	0.1.2		This Class allows you to easily use ANSI console colors in your application.	
24	pear/Console_CommandLine	1.2.0		A full featured command line options and arguments parser	
25	pear/Console_Getargs	1.3.5	1.3.5	A command-line arguments parser	
26	pear/Console_Getopt	1.3.1	1.3.1	Command-line option parser	
27	pear/Console_GetoptPlus	1.0.0RC1		Command-line option parser - Console Getopt+ (Getopt Plus)	
28	pear/Console_ProgressBar	0.5.2beta		This class provides you with an easy-to-use interface to progress bars.	
29	pear/Console_Table	1.1.6		Class that makes it easy to build console style tables	
30	pear/Contact_AddressBook	0.5.1		Address book export-import class	
31	pear/Contact_Vcard_Build	1.1.2		Build (create) and fetch vCard 2.1 and 3.0 text blocks.	
32	pear/Contact_Vcard_Parse	1.32.0		Parse vCard 2.1 and 3.0 files.	
33	pear/Crypt_Blowfish	1.1.0RC2		Allows for quick two-way blowfish encryption without requiring the MCrypt PHP extension.	
34	pear/Crypt_CBC	1.0.1		A class to emulate Perl's Crypt::CBC module.	
35	pear/Crypt_CHAP	1.5.0	1.5.0	Generating CHAP packets.	
36	pear/Crypt_DiffieHellman	0.2.6		Implementation of Diffie-Hellman Key Exchange cryptographic protocol for PHP5	
37	pear/Crypt_GPG	1.4.0b4		GNU Privacy Guard (GnuPG)	
38	pear/Crypt_HMAC	1.0.1		A class to calculate RFC 2104 compliant hashes.	
39	pear/Crypt_HMAC2	1.0.0		Implementation of Hashed Message Authentication Code for PHP5	
40	pear/Crypt_MicroID	0.1.0		PHP MicroID library.	
41	pear/Crypt_RC4	1.0.3		Encryption class for RC4 encryption. Users are highly encourages to migrate to Crypt_RC42 (Crypt RC4 2.0); a PHP5 compatible release with multiple bug fixes.	
42	pear/Crypt_RC42	0.9.0		Encryption class for RC4 encryption for PHP 5	
43	pear/Crypt_RSA	1.2.1		Provides RSA-like key generation, encryption/decryption, signing and signature checking. Users are strongly advised to migrate to phpseclib's Crypt_RSA; which is better maintained and less vulnerable to security issues.	
44	pear/Crypt_Xtea	1.1.0		A class that implements the Tiny Encryption Algorithm (TEA) (New Variant).	
45	pear/Crypt_XXTEA	0.9.0		An implementation of the XXTEA encryption algorithm. NOTICE: unregular default behavior.	
46	pear/Date	1.5.0a4		Generic date/time handling class for PEAR	
47	pear/Date_Holidays	0.21.8		Driver based class to calculate holidays.	
48	pear/Date_Holidays_Australia	0.2.2		Driver based class to calculate holidays in Australia.	
49	pear/Date_Holidays_Austria	0.1.5		Driver based class to calculate holidays in Austria.	
50	pear/Date_Holidays_Brazil	0.1.2		Driver based class to calculate holidays in Brazil.	
51	pear/Date_Holidays_Croatia	0.1.1		Driver based class to calculate holidays in Croatia.	
52	pear/Date_Holidays_Czech	0.1.0		Driver based class to calculate holidays in the Czech Republic.	
53	pear/Date_Holidays_Denmark	0.1.3		Driver based class to calculate holidays in Denmark.	
54	pear/Date_Holidays_Discordian	0.1.1		Driver based class to calculate Discordian holidays.	
55	pear/Date_Holidays_EnglandWales	0.1.5		Driver based class to calculate holidays in England and Wales.	
56	pear/Date_Holidays_Finland	0.1.2		Driver based class to calculate holidays in Finland.	
57	pear/Date_Holidays_Germany	0.1.2		Driver based class to calculate holidays in Germany.	
58	pear/Date_Holidays_Iceland	0.1.2		Driver based class to calculate holidays in Iceland.	
59	pear/Date_Holidays_Ireland	0.1.3		Driver based class to calculate holidays in Ireland.	
60	pear/Date_Holidays_Italy	0.1.1		Driver based class to calculate holidays in Italy.	
61	pear/Date_Holidays_Japan	0.1.2		Driver based class to calculate holidays in Japan.	
62	pear/Date_Holidays_Netherlands	0.1.4		Driver based class to calculate holidays in the Netherlands.	
63	pear/Date_Holidays_Norway	0.1.2		Driver based class to calculate holidays in Norway.	
64	pear/Date_Holidays_PHPdotNet	0.1.2		Driver based class to calculate birthdays of some members of the PHP.net community.	
65	pear/Date_Holidays_Portugal	0.1.0		Driver based class to calculate holidays in Portugal.	
66	pear/Date_Holidays_Romania	0.1.2		Driver based class to calculate holidays in Romania.	
67	pear/Date_Holidays_Russia	0.1.0		Driver based class to calculate holidays in Russia.	
68	pear/Date_Holidays_SanMarino	0.1.1		Driver based class to calculate holidays in San Marino.	
69	pear/Date_Holidays_Serbia	0.1.0		Driver based class to calculate holidays in Serbia.	
70	pear/Date_Holidays_Slovenia	0.1.2		Driver based class to calculate holidays in Slovenia.	
71	pear/Date_Holidays_Spain	0.1.3		Driver based class to calculate holidays in Spain.	
72	pear/Date_Holidays_Sweden	0.1.3		Driver based class to calculate holidays in Sweden.	
73	pear/Date_Holidays_Turkey	0.1.1		Driver based class to calculate holidays in Turkey.	
74	pear/Date_Holidays_Ukraine	0.1.2		Driver based class to calculate holidays in the Ukraine.	
75	pear/Date_Holidays_UNO	0.1.3		Driver based class to calculate holidays in UNO.	
76	pear/Date_Holidays_USA	0.1.1		Driver based class to calculate holidays in USA.	
77	pear/Date_Holidays_Venezuela	0.1.1		Driver based class to calculate holidays in Venezuela.	
78	pear/Date_HumanDiff	0.4.1		Generate textual time differences that are easily understandable by humans	
79	pear/DB	1.7.14	1.7.14	Database Abstraction Layer	
80	pear/DBA	1.1.1		Berkely-style database abstraction class	
81	pear/DBA_Relational	0.2.0		Berkely-style database abstraction class	
82	pear/DB_ado	1.3.1		DB driver which use MS ADODB library	
83	pear/DB_DataObject	1.11.2		An SQL Builder, Object Interface to Database Tables	
84	pear/DB_DataObject_FormBuilder	1.0.2		Class to automatically build HTML QuickForm objects from a DB_DataObject-derived class	
85	pear/DB_Idap	1.2.1		DB interface to LDAP server	
86	pear/DB_Idap2	0.5.1		DB drivers for LDAP v2 and v3 database	
87	pear/DB_NestedSet	1.4.1		API to build and query nested sets	
88	pear/DB_NestedSet2			API to build and query nested sets	
89	pear/DB_odbt	1.0.4		DB interface for ODBTP	
90	pear/DB_Pager	0.7.2		Retrieve and return information of database result sets	
91	pear/DB_QueryTool	1.1.2		An OO-interface for easily retrieving and modifying data in a DB.	
92	pear/DB_Sqlite_Tools	0.1.7		DB_Sqlite_Tools is an object oriented interface to effectively manage and backup Sqlite	
93	pear/DB_Table	1.5.6		An object oriented interface to, and model of, a database. Integrates with HTML Quick Form.	
94	pear/Event_Dispatcher	1.1.0		Dispatch notifications using PHP callbacks	
95	pear/Event_SignalEmitter	0.3.2		Generic signal emitting class with the same API as GObject.	
96	pear/File	1.4.1		Common file and directory routines	
97	pear/File_Archive	1.5.5		File Archive will let you manipulate easily the tar, gz, tgz, bz2, tbz, zip, ar (or deb) files	
98	pear/File_Bittorrent	1.1.0		Decode and Encode data in Bittorrent format	
99	pear/File_Bittorrent2	1.3.1		Decode and Encode data in Bittorrent format	

No	PACKAGE	LATEST	LOCAL	Description	Check
100	pear/File Cabinet	0.1.0		Microsoft Cabinet file extraction using either cabextract or expand	
101	pear/File CSV	1.0.0		Read and write of CSV files	
102	pear/File CSV DataSource	1.0.1		Simple data access object for csv files in php5.	
103	pear/File DeliciousLibrary	0.1.1		Parser for the library database of the Delicious Library software.	
104	pear/File DICOM	0.3		Package for reading and modifying DICOM files	
105	pear/File DNS	0.1.0		Manipulate RFC1033-style DNS Zonefiles	
106	pear/File Find	1.3.2		A Class facilitates the search of filesystems	
107	pear/File Fortune	1.0.0		File Fortune provides an interface for reading from and writing to fortune files.	
108	pear/File Fstab	2.0.3		Read and write fstab files	
109	pear/File Gettext	0.4.2		GNU Gettext file parser	
110	pear/File HtAccess	1.2.1		Manipulate .htaccess files	
111	pear/File IMC	0.5.0		Create and parse Internet Mail Consortium-style files (like vCard and vCalendar)	
112	pear/File Infopath	0.1.0		A package to read the schema and views in html from a Microsoft Infopath file	
113	pear/File MARC	1.0.2		Parse, modify, and create MARC records	
114	pear/File Mogile	0.2.0		PHP interface to MogileFS	
115	pear/File Ogg	0.3.1		Retrieves metadata from Ogg files.	
116	pear/File Passwd	1.1.7	1.1.7	Manipulate many kinds of password files	
117	pear/File PDF	0.3.3		PDF generation using only PHP.	
118	pear/File_SearchReplace	1.1.4		Performs search and replace routines. The package always perform replace and doesn't provide separate functions for search.	
119	pear/File Sitemap	0.1.4		Create and manage sitemap files.	
120	pear/File SMBPasswd	1.0.3	1.0.3	Class for managing SAMBA style password files.	
121	pear/File Util	1.0.0		Common file and directory utility functions	
122	pear/File XSPF	0.3.1		Package for Manipulating XSPF Playlists	
123	pear/FSM	1.3.1		Finite State Machine	
124	pear/Games_Chess	1.0.1		Construct and validate a logical chess game, does not display	
125	pear/Genealogy_Gedcom	1.0.1		Gedcom parser	
126	pear/Gtk2_EntryDialog	1.0.0		Message box with text entry field	
127	pear/Gtk2_ExceptionDump	1.1.1		Analyze exceptions, php and PEAR errors visually	
128	pear/Gtk2_FileDrop	1.0.0		Make Gtk widgets accept file drops	
129	pear/Gtk2_IndexedComboBox	1.1.0		Indexed Gtk2 combo box similar to the HTML select box.	
130	pear/Gtk2_PHPConfig	1.0.0RC2		GUI Interface to the php.ini file	
131	pear/Gtk2_ScrollingLabel	0.4.1		A Scrolling label for PHP-Gtk2	
132	pear/Gtk2_VarDump	1.0.0		A simple GUI to examine php data trees	
133	pear/Gtk2_FileDrop	1.0.3		Make Gtk widgets accept file drops	
134	pear/Gtk_MDB_Designer	0.1		An Gtk Database schema designer	
135	pear/Gtk_ScrollingLabel	1.0.0		A scrolling label for PHP-Gtk	
136	pear/Gtk_Styled	1.0.0		PHP-GTK pseudo-widgets that mimic GtkData based objects and allow the look and feel to be controlled by the programmer.	
137	pear/Gtk_VarDump	1.0.1		A simple GUI to example php data trees	
138	pear/HTML_AJAX	0.5.6		PHP and JavaScript AJAX library	
139	pear/HTML_BBCodeParser	1.2.4		This is a parser to replace UBB style tags with their html equivalents.	
140	pear/HTML_BBCodeParser2	0.1.0		A PHP5 replacement for HTML_BBCodeParser. This is a parser to replace UBB style tags with their html equivalents.	
141	pear/HTML_Common	1.2.5		PEAR:HTML_Common is a base class for other HTML classes.	
142	pear/HTML_Common2	2.1.0		Abstract base class for HTML classes (PHP5 port of HTML_Common package).	
143	pear/HTML_Crypt	1.3.4		Encrypts text which is later decoded using javascript on the client side	
144	pear/HTML_CSS	1.5.4		Provides a simple interface for validate, handle and generate cascading style sheets	
145	pear/HTML_Entities	0.2.2		Convert text to/from HTML entities.	
146	pear/HTML_Form	1.3.0		Simple HTML form package	
147	pear/HTML_Javascript	1.1.2		Provides an interface for creating simple JS scripts.	
148	pear/HTML_Menu	2.1.4		Generates HTML menus from multidimensional hashes.	
149	pear/HTML_Page	2.0.0RC2		PEAR:HTML_Page is a base class for XHTML page generation.	
150	pear/HTML_Page2	0.6.3		PEAR:HTML_Page2 is a base class for XHTML page generation.	
151	pear/HTML_Progress	1.2.6		How to include a loading bar in your XHTML documents quickly and easily.	
152	pear/HTML_Progress2	2.4.2		How to include a loading bar in your XHTML documents quickly and easily.	
153	pear/HTML_QuickForm	3.2.13		The PEAR:HTML_QuickForm package provides methods for creating, validating, processing HTML forms.	
154	pear/HTML_QuickForm2	2.0.0		PHP5 rewrite of HTML_QuickForm package	
155	pear/HTML_QuickForm2_Captcha	0.1.2		Captcha package for QuickForm2	
156	pear/HTML_QuickForm_advmultiselect	1.5.1		Element for HTML_QuickForm that emulate a multi-select.	
157	pear/HTML_QuickForm_alselect	1.1.1		An alternative to HTML_QuickForm_select using radio buttons and checkboxes	
158	pear/HTML_QuickForm_CAPTCHA	0.3.0		Drop-in CAPTCHA element for QuickForm forms	
159	pear/HTML_QuickForm_Controller	1.0.10		The add-on to HTML_QuickForm package that allows building of multipage forms	
160	pear/HTML_QuickForm_DHTMLRulesTableless	0.3.3		DHTML replacement for the standard JavaScript alert window for client-side validation using the tableless renderer	
161	pear/HTML_QuickForm_ElementGrid	0.1.2		An HTML_QuickForm meta-element which holds any other element in a grid	
162	pear/HTML_QuickForm_Livesearch	0.4.1		Element for HTML_QuickForm to enable a suggest search.	
163	pear/HTML_QuickForm_Renderer_Tableless	0.6.2		Replacement for the default renderer that doesn't use table tags, and generates fully valid XHTML output.	
164	pear/HTML_QuickForm_Rule_Spelling	0.2.0		A HTML_QuickForm rule plugin that checks the spelling of its values	
165	pear/HTML_QuickForm_SelectFilter	1.0.0RC1		Element for PEAR:HTML_QuickForm that defines dynamic filters on the client side for select elements.	
166	pear/HTML_Safe	0.10.1		This parser strips down all potentially dangerous content within HTML	
167	pear/HTML_Select	1.3.1		HTML_Select is a class for generating HTML form select elements.	
168	pear/HTML_Select_Common	1.2.0		Some small classes to handle common <select> lists	
169	pear/HTML_Table	1.8.3		PEAR:HTML_Table makes the design of HTML tables easy, flexible, reusable and efficient.	
170	pear/HTML_Table_Matrix	1.0.10		Autofill a table with data	
171	pear/HTML_TagCloud	1.0.0		Generate a "Tag Cloud" in HTML and visualize tags by their frequency. Additionally visualizes each tag's age.	
172	pear/HTML_Template_Flexy	1.3.12		An extremely powerful Tokenizer driven Template engine	
173	pear/HTML_Template_IT	1.3.0		Integrated Templates	
174	pear/HTML_Template_PHPLIB	1.5.2		preg_* based template system.	
175	pear/HTML_Template_PHPTAL			Templating engine for XHTML and HTML5 with XML syntax and protection against XSS.	
176	pear/HTML_Template_Sigma	1.2.0		An implementation of Integrated Templates API with template 'compilation' added	
177	pear/HTML_Template_Xipe	1.7.6		A simple, fast and powerful template engine.	
178	pear/HTML_TreeMenu	1.2.2		Provides an api to create a HTML tree	
179	pear/HTTP	1.4.1		Miscellaneous HTTP utilities	
180	pear/HTTP2	1.1.1		Miscellaneous HTTP utilities	
181	pear/HTTP_Client	1.2.1	1.2.1	Easy way to perform multiple HTTP requests and process their results	
182	pear/HTTP_Download	1.1.4		Send HTTP Downloads	
183	pear/HTTP_Download2			A fork of HTTP_Download for PHP5+	
184	pear/HTTP_FloodControl	0.1.1		Detect and protect from attempts to flood a site	
185	pear/HTTP_Header	1.2.1		OO interface to modify and handle HTTP headers and status codes. PEAR QA would recommend Symphony HTTP Foundation for PHP 5.3+ users. See http://symfony.com/doc/current/components/http_foundation.html	
186	pear/HTTP_Header2	0.1.0		A fork of HTTP_Header for PHP5+	
187	pear/HTTP_OAuth	0.3.1	0.2.3	PEAR implementation of the OAuth 1.0a specification	
188	pear/HTTP_Request	1.4.4	1.4.4	Provides an easy way to perform HTTP requests	
189	pear/HTTP_Request2	2.1.1	2.1.1	Provides an easy way to perform HTTP requests.	
190	pear/HTTP_Server	0.4.1		HTTP server class.	
191	pear/HTTP_Session	0.5.6		Object-oriented interface to the session_* family functions	
192	pear/HTTP_Session2	0.7.3		PHP5 Session Handler	
193	pear/HTTP_SessionServer	0.5.0		Daemon to store session data that can be accessed via a simple protocol.	
194	pear/HTTP_Upload	1.0.0b2		Easy and secure management of files submitted via HTML Forms	
195	pear/HTTP_WebDAV_Client	1.0.2		WebDAV stream wrapper class	

No	PACKAGE	LATEST	LOCAL	Description	Check
196	pear/HTTP_WebDAV_Server	1.0.0RC8		WebDAV Server Baseclass.	
197	pear/I18N	1.0.0		Internationalization package	
198	pear/I18Nv2	0.11.4		Internationalization	
199	pear/I18N_UnicodeNormalizer	1.0.0		Unicode Normalizer	
200	pear/I18N_UnicodeString	0.3.1		Provides a way to work with self contained multibyte strings	
201	pear/Image_3D	0.4.2		This class allows the rendering of 3 dimensional objects utilizing PHP.	
202	pear/Image_Barcode	1.1.3		Barcode generation	
203	pear/Image_Barcode2	0.2.3		Barcode generation	
204	pear/Image_Canvas	0.3.5		A package providing a common interface to image drawing, making image source code independent on the library used.	
205	pear/Image_Color	1.0.4		Manage and handles color data and conversions.	
206	pear/Image_Color2	0.1.5		Color conversion and mixing for PHP5	
207	pear/Image_GIS	1.1.2		Visualization of GIS data.	
208	pear/Image_GIS2	0.1.0		Visualization of GIS data.	
209	pear/Image_Graph	0.8.0		A package for displaying (numerical) data as a graph/chart/plot.	
210	pear/Image_GraphViz	1.3.0		Interface to AT&T's GraphViz tools	
211	pear/Image_IPTC	1.0.2		Extract, modify, and save IPTC data	
212	pear/Image_JpegMarkerReader	0.5.0		Read arbitrary markers from JPEG files.	
213	pear/Image_JpegXmpReader	0.5.3		Read Photoshop-style XMP metadata from JPEG files.	
214	pear/Image_MonoBMP	0.1.0		Manipulate monochrome BMP images	
215	pear/Image_Puzzle	0.2.2		Generates puzzle pieces from image file	
216	pear/Image_QRCode	0.1.3		A QR (2D) barcode image generator.	
217	pear/Image_Remote	1.0.2		Retrieve information on remote image files.	
218	pear/Image_Text	0.7.0		Image_Text - Advanced text maipulations in images.	
219	pear/Image_Tools	1.0.0RC1		Tools collection for image manipulation.	
220	pear/Image_Transform	0.9.5		Provides a standard interface to manipulate images using different libraries	
221	pear/Image_WBMP	0.1.0		Manipulate WBMP images	
222	pear/Image_XBM	0.9.0RC1		Manipulate XBM images	
223	pear/Inline_C	0.1		Allows inline inclusion of function definitions in C	
224	pear/LiveUser	0.16.14		User authentication and permission management framework	
225	pear/LiveUser_Admin	0.4.0		User authentication and permission management framework	
226	pear/Log	1.12.7	1.12.7	Logging Framework	
227	pear/Mail	1.2.0	1.2.0	Class that provides multiple interfaces for sending emails	
228	pear/Mail_IMAP	1.1.0RC2		Provides a c-client backend for webmail.	
229	pear/Mail_IMAPv2	0.2.1		Provides a c-client backend for webmail.	
230	pear/Mail_Mbox	0.6.3		Read and modify Unix MBOXes	
231	pear/Mail_Mime	1.8.8	1.8.5	Mail Mime provides classes to create MIME messages.	
232	pear/Mail_Mime2			Mail Mime provides classes to create MIME messages.	
233	pear/Mail_mimeDecode	1.5.5		Provides a class to decode mime messages.	
234	pear/Mail_Queue	1.2.7		Class for put mails in queue and send them later in background.	
235	pear/Math_Basex	0.3.1		Simple class for converting base set of numbers with a customizable character base set.	
236	pear/Math_BigInteger	1.0.0		Pure-PHP arbitrary precision integer arithmetic library	
237	pear/Math_BinaryUtils	0.3.0		Collection of helper methods for easy handling of binary data.	
238	pear/Math_Combinatorics	1.0.0		A package that produces combinations and permutations	
239	pear/Math_Complex	0.8.6		Classes that define complex numbers and their operations	
240	pear/Math_Derivative	1.0.0RC1		Calculate the derivative of a mathematical expression	
241	pear/Math_Fibonacci	0.8		Package to calculate and manipulate Fibonacci numbers	
242	pear/Math_Finance	1.0.1		Financial functions	
243	pear/Math_Fraction	0.4.1		Classes that represent and manipulate fractions.	
244	pear/Math_Histogram	0.9.0		Classes to calculate histogram distributions	
245	pear/Math_Integer	0.9.0		Package to represent and manipulate integers	
246	pear/Math_Matrix	0.8.7		Class to represent matrices and matrix operations	
247	pear/Math_Numerical_RootFinding	1.1.0a2		Numerical Root-Finding methods package in PHP	
248	pear/Math_Polynomial	0.1.0		Package to represent and manipulate Polynomial equations	
249	pear/Math_Quaternion	0.8.0		Classes that define Quaternions and their operations	
250	pear/Math_RPN	1.1.2		Reverse Polish Notation.	
251	pear/Math_Stats	0.9.1		Classes to calculate statistical parameters	
252	pear/Math_TrigOp	1		Supplementary trigonometric functions	
253	pear/Math_Vector	0.7.0		Vector and vector operation classes	
254	pear/MDB	1.3.0		database abstraction layer	
255	pear/MDB2	2.5.0b5	2.4.1	database abstraction layer	
256	pear/MDB2_Driver_fbsql	0.3.0		fbsql MDB2 driver	
257	pear/MDB2_Driver_ibase	1.5.0b5		ibase MDB2 driver	
258	pear/MDB2_Driver_mssql	1.5.0b4		mssql MDB2 driver	
259	pear/MDB2_Driver_mysql	1.5.0b4	1.4.1	mysql MDB2 driver	
260	pear/MDB2_Driver_mysqli	1.5.0b4	1.4.1	mysqli MDB2 driver	
261	pear/MDB2_Driver_oci8	1.5.0b4		oci8 MDB2 driver	
262	pear/MDB2_Driver_odbc	0.2.0		ODBC Driver for MDB2	
263	pear/MDB2_Driver_pgsql	1.5.0b4		pgsql MDB2 driver	
264	pear/MDB2_Driver_querysim	0.7.0		querysim MDB2 driver	
265	pear/MDB2_Driver_sqlite	1.5.0b4		sqlite MDB2 driver	
266	pear/MDB2_Driver_sqlsrv	1.5.0b5		sqlsrv MDB2 driver	
267	pear/MDB2_Schema	0.8.5		XML based database schema manager	
268	pear/MDB2_TableBrowser	0.1.3		Database table abstraction library	
269	pear/MDB_QueryTool	1.2.3		An OO-interface for easily retrieving and modifying data in a DB.	
270	pear/Message	0.6		Message hash and digest (HMAC) generation methods and classes	
271	pear/MIME_Type	1.3.3	1.3.1	Utility class for dealing with MIME types	
272	pear/MP3_Id	1.2.2		Read/Write MP3-Tags	
273	pear/MP3_IDv2	0.1.8		Read/Write IDv2-Tags	
274	pear/MP3_Playlist	0.5.2		Library to create MP3 playlists on the fly, several formats supported including XML,RSS and	
275	pear/Net_CDDB	0.3.0		Package to access and query, and build CDDB audio-CD servers	
276	pear/Net_CheckIP	1.2.2		Check the syntax of IPv4 addresses	
277	pear/Net_CheckIP2	1.0.0RC3		A package to determine if an IP (v4) is valid.	
278	pear/Net_Curl	1.2.5		Net_Curl provides an OO interface to PHP's cURL extension	
279	pear/Net_Cyrus	0.3.2		provides an API for the administration of Cyrus IMAP servers.	
280	pear/Net_Dict	1.0.7		Interface to the DICT Protocol	
281	pear/Net_Dig	0.1		The PEAR::Net_Dig class should be a nice, friendly OO interface to the dig command	
282	pear/Net_DIME	1.0.2		The Net DIME package implements DIME encoding and decoding	
283	pear/Net_DNS	1.0.7		Resolver library used to communicate with a DNS server.	
284	pear/Net_DNS2	1.3.2		PHP5 Resolver library used to communicate with a DNS server.	
285	pear/Net_DNSBL	1.3.7		Checks if a given Host or URL is listed on an DNS-based Blackhole List (DNSBL, Real-time Blackhole List or RBL) or Spam URI Realtime Blocklist (SURBL)	
286	pear/Net_Finger	1.0.1		The PEAR::Net_Finger class provides a tool for querying Finger Servers	
287	pear/Net_FTP	1.4.0a3		Net_FTP provides an OO interface to the PHP FTP functions plus some additions	
288	pear/Net_GameServerQuery	0.3.0		An interface to query and return information from a game server	
289	pear/Net_Gearman	0.2.3		A PHP interface to Gearman	
290	pear/Net_Geo	1.0.5		Geographical locations based on Internet address	
291	pear/Net_GeoIP	1.0.0		Library to perform geo-location lookups of IP addresses.	
292	pear/Net_Growl	2.7.0		Send notifications to Growl from PHP on MACOSX and WINDOWS	
293	pear/Net_HL7	0.1.1		HL7 messaging API	
294	pear/Net_Ident	1.1.0		Identification Protocol implementation	
295	pear/Net_IDNA	0.8.1		Punycode encoding and decoding.	
296	pear/Net_IDNA2	0.1.1		Punycode encoding and decoding.	
297	pear/Net_IMAP	1.1.2		Provides an implementation of the IMAP protocol	
298	pear/Net_IPv4	1.3.4		IPv4 network calculations and validation.	
299	pear/Net_IPv6	1.2.2b2		Check and validate IPv6 addresses	

No	PACKAGE	LATEST	LOCAL	Description	Check
300	pear/Net_IRC	0.0.7		IRC Client Class	
301	pear/Net_LDAP	1.1.5		Object oriented interface for searching and manipulating LDAP-entries	
302	pear/Net_LDAP2	2.1.0		Object oriented interface for searching and manipulating LDAP-entries	
303	pear/Net_LMTP	1.0.2		Provides an implementation of the RFC2033 LMTP protocol	
304	pear/Net_MAC	0.1.5		Validates and formats MAC addresses	
305	pear/Net_Monitor	0.2.5		Remote Service Monitor	
306	pear/Net_MPD	1.0.2		Music Player Daemon interaction API	
307	pear/Net_Nmap	1.0.4		A simple wrapper class for the Nmap utility	
308	pear/Net_NNTP	1.5.0		NNTP implementation	
309	pear/Net_Ping	2.4.5		Execute ping	
310	pear/Net_POP3	1.3.8	1.3.8	Provides a POP3 class to access POP3 server.	
311	pear/Net_Portscan	1.0.3		Portscanner utilities.	
312	pear/Net_Server	1.0.3		Generic server class	
313	pear/Net_Sieve	1.3.2		Handles talking to a sieve server.	
314	pear/Net_SmartIRC	1.0.2		Net_SmartIRC is a PHP class for communication with IRC networks	
315	pear/Net_SMPP	0.4.5		SMPP v3.4 protocol implementation	
316	pear/Net_SMPP_Client	0.3.2		SMPP v3.4 client	
317	pear/Net_SMS	0.2.0		SMS functionality.	
318	pear/Net_SMTP	1.6.2	1.6.1	An implementation of the SMTP protocol	
319	pear/Net_Socket	1.0.14	1.0.10	Network Socket Interface	
320	pear/Net_SSH2			ssh2 client abstraction layer	
321	pear/Net_Traceroute	0.21.3		Execute traceroute	
322	pear/Net_URL	1.0.15	1.0.15	Easy parsing of Urls	
323	pear/Net_URL2	2.0.1	2.0.0	Class for parsing and handling URL	
324	pear/Net_URL_Mapper	0.9.1		Provides a simple and flexible way to build nice URLs for web applications.	
325	pear/Net_UserAgent_Detect	2.5.2		Net_UserAgent_Detect determines the Web browser, version, and platform from an HTTP user agent string	
326	pear/Net_UserAgent_Mobile	1.0.0		HTTP mobile user agent string parser	
327	pear/Net_UserAgent_Mobile_GPS	0.1.1		Interface for GPS	
328	pear/Net_Vpopmail	0.3.2		Class for accessing Vpopmail's vpopmail daemon	
329	pear/Net_WebFinger	0.3.2		WebFinger client library for PHP	
330	pear/Net_Whois	1.0.5		The PEAR::Net_Whois class provides a tool to query internet domain name and network number directory services	
331	pear/Net_Wifi	1.2.0		Scans for wireless networks	
332	pear/Numbers_Roman	1.0.2		Provides methods for converting to and from Roman Numerals.	
333	pear/Numbers_Words	0.16.4		The PEAR Numbers_Words package provides methods for spelling numerals in words.	
334	pear/OLE	1.0.0RC2		Package for reading and writing OLE containers	
335	pear/OpenDocument	0.2.1		Read, create and modify OASIS OpenDocument office files.	
336	pear/OpenID	0.3.3		PHP implementation of OpenID 1.1 and 2.0	
337	pear/Pager	2.4.8		Data paging class	
338	pear/Pager_Sliding	1.6		Sliding Window Pager.	
339	pear/Payment_Cleop	0.2.0		These classes can create a cleiop03 file for you which you can send to a Dutch Bank.Ofcourse you need also a Dutch bank account.	
340	pear/Payment_DTA	1.4.3		Creates and reads DTA and DTAZV files containing money transaction data (Germany).	
341	pear/Payment_PagamentoCerto	0.2.3		PHP client to Brazilian payment gateway PagamentoCerto	
342	pear/Payment_PayPal_SOAP	0.5.1		PayPal SOAP API client	
343	pear/Payment_Process	0.6.8		Unified payment processor	
344	pear/Payment_Process2	0.3.1		A PHP5 Payment process API	
345	pear/PEAR	1.9.4	1.9.4	PEAR Base System	
346	pear/pearweb	1.26.0		The source code for the PEAR website	
347	pear/pearweb_channelxml	1.15.2		channel.xml and DTD for pear.php.net channel	
348	pear/pearweb_election	1.0.2		The source code for the PEAR website election	
349	pear/pearweb_goppear	1.1.7		go-pear script for pear.php.net	
350	pear/pearweb_index	1.22.1		The source code for the PEAR website, informational front pages	
351	pear/pearweb_manual	1.2.2		The source code for the PEAR website manual bits	
352	pear/pearweb_pepr	1.0.5		The source code for the PEAR website package voting	
353	pear/pearweb_phars	1.9.5		The source code for the PEAR website: go-pear.phar/install-pear-nozlib.phar	
354	pear/pearweb_qa	1.0.3		The source code for the PEAR website QA scripts	
355	pear/PEAR_Command_Packaging	0.3.0		make-rpm-spec command for managing RPM .spec files for PEAR packages	
356	pear/PEAR_Delegator	0.1.0		Delegation for PHP	
357	pear/PEAR_Exception			A standalone instance of PEAR Exception for PHP 5+ packages	
358	pear/PEAR_Frontend_Gtk	0.4.0		Deprecated - Use PEAR_Frontend_Gtk2	
359	pear/PEAR_Frontend_Gtk2	1.1.0		Graphical PEAR installer based on PHP-Gtk2	
360	pear/PEAR_Frontend_Web	0.7.5		Webbased PEAR Package Manager	
361	pear/PEAR_Info	1.9.2	1.9.2	Show Information about your PEAR install and its packages	
362	pear/PEAR_PackageFileManager	1.7.0		PEAR_PackageFileManager takes an existing package.xml file and updates it with a newfilelist and changelog	
363	pear/PEAR_PackageFileManager2	1.0.2		PEAR_PackageFileManager2 takes an existing package.xml file and updates it with a new filelist and changelog	
364	pear/PEAR_PackageFileManager_Cli	0.4.0		A command line interface to PEAR_PackageFileManager	
365	pear/PEAR_PackageFileManager_Frontend	0.8.0		PEAR_PackageFileManager_Frontend, the singleton-based frontend for user input/output.	
366	pear/PEAR_PackageFileManager_Frontend_Web	0.6.0		A Web GUI frontend for the PEAR_PackageFileManager2 class.	
367	pear/PEAR_PackageFileManager_GUI_Gtk	1.0.1		A PHP-GTK frontend for the PEAR_PackageFileManager class.	
368	pear/PEAR_PackageFileManager_Plugins	1.0.2		The plugins for PEAR_PackageFileManager to pick up what files to use, supported are File, CVS, SVN, Perforce	
369	pear/PEAR_PackageUpdate	1.1.0RC1		A simple way to update packages at run time.	
370	pear/PEAR_PackageUpdate_Gtk2	0.3.2		A PHP-GTK 2 front end for PEAR_PackageUpdate	
371	pear/PEAR_PackageUpdate_Web	1.0.1		A Web front end for PEAR_PackageUpdate	
372	pear/PEAR_RemoteInstaller	0.3.2		PEAR Remote installation plugin through FTP, SFTP, and FTPS	
373	pear/PEAR_Size	0.2.0		Determine and list how much filespace each installed package consumes.	
374	pear/PHPDoc	0.1.0		Tool to generate documentation from the source	
375	pear/PhpDocumentor	1.5.0a1		The phpDocumentor package provides automatic documenting of php api directly from the	
376	pear/PHPUnit	1.3.2		Regression testing framework for unit tests.	
377	pear/PHPUnit2	2.3.6		Regression testing framework for unit tests.	
378	pear/PHP_Archive	0.11.4		Create and Use PHP Archive files	
379	pear/PHP_ArrayOf	0.2.1		Abstract class package to create arrays of specific element types	
380	pear/PHP_Beautifier	0.1.15		Beautifier for Php	
381	pear/PHP_CodeSniffer	1.5.1		PHP_CodeSniffer tokenises PHP, JavaScript and CSS files and detects violations of a defined set of coding standards.	
382	pear/PHP_Compat	1.6.0a3		Provides components to achieve PHP version independence	
383	pear/PHP_CompatInfo	1.9.0		Find out the minimum version and the extensions required for a piece of code to run	
384	pear/PHP_Debug	1.0.3		PHP_Debug provides assistance in debugging PHP code	
385	pear/PHP_DocBlockGenerator	1.1.2		DocBlock Generator	
386	pear/PHP_Fork	0.3.2		PHP_Fork class. Wrapper around the pcntl_fork() stuff with a API set like Java language	
387	pear/PHP_FunctionCallTracer	1.0.0		Function Call Tracer	
388	pear/PHP_LexerGenerator	0.4.0		translate lexer files in lex2php format into a PHP 5 lexer	
389	pear/PHP_Parser	0.2.2		A PHP Grammar Parser	
390	pear/PHP_ParserGenerator	0.1.7		translate grammar files in Lemon Parser Generator format into a PHP 5 parser	
391	pear/PHP_Parser_DocblockParser	0.1.1		A /** docblock */ parser	
392	pear/PHP_Shell	0.3.2		a interactive PHP Shell	
393	pear/PHP_UML	1.6.1		A reverse-engineering package that scans PHP files and directories, and delivers an UML/XMI representation of the classes and packages found.	
394	pear/QA_Peardoc_Coverage	1.1.1		PEAR documentation coverage analysis.	
395	pear/RDF	0.2.0		Port of the core RAP API	
396	pear/RDF_N3	0.2.0		Port of the RAP N3 parser/serializer	
397	pear/RDF_NTriples	0.2.0		Port of the RAP NTriples serializer	

No	PACKAGE	LATEST	LOCAL	Description	Check
398	pear/RDF_RDQL	0.2.0		Port of the RAP RDQL API	
399	pear/Science_Chemistry	1.1.2		Classes to manipulate chemical objects: atoms, molecules, etc.	
400	pear/ScriptReorganizer	0.4.0		Library/Tool focusing exclusively on the file size aspect of PHP script optimization.	
401	pear/Search_Mnogosearch	0.1.1		Wrapper classes for the mnoGoSearch extension	
402	pear/Services_Akismet	1.0.1		PHP client for the Akismet REST API	
403	pear/Services_Akismet2	0.3.1		PHP client for the Akismet REST API	
404	pear/Services_Amazon	0.9.0		PHP interface to Amazon Product Advertising API	
405	pear/Services_Amazon_S3	0.4.0		PHP API for Amazon S3 (Simple Storage Service)	
406	pear/Services_Amazon_SQS	0.3.0		PHP API and tools for Amazon SQS (Simple Queue Service)	
407	pear/Services_Apns	0.1.0		Interface for communication with Apple Push Notifications Service (APNS).	
408	pear/Services_Atlassian_Crowd	0.9.5		Services_Atlassian_Crowd is a package to use Atlassian Crowd from PHP	
409	pear/Services_Blogging	0.2.4		Access your blog with PHP	
410	pear/Services_Compete	0.1.0		Compete API	
411	pear/Services_Delicious	0.6.0		Client for the del.icio.us web service.	
412	pear/Services_Digg	0.4.7		PHP interface to Digg's API	
413	pear/Services_Digg2	0.3.2		Second generation Digg API client	
414	pear/Services_DynDNS	0.3.1		Provides access to the DynDNS web service	
415	pear/Services_Ebay	0.13.1		Interface to eBay's XML-API.	
416	pear/Services_ExchangeRates	0.8.0		Performs currency conversion	
417	pear/Services_Facebook	0.2.14		PHP interface to Facebook's API	
418	pear/Services_GeoNames	1.0.1		A PHP5 interface to the GeoNames public API	
419	pear/Services_Google	0.2.0		Provides access to the Google SOAP Web APIs	
420	pear/Services_Hatena	0.1.5		WebServices for Hatena	
421	pear/Services_JSON	1.0.3		PHP implementaion of json_encode/decode	
422	pear/Services_Libravatar	0.2.3		API interfacing class for libravatar.org	
423	pear/Services_Mailman	0.1.0		Integrates Mailman into a website using PHP	
424	pear/Services_oEmbed	0.2.0		A package for consuming oEmbed	
425	pear/Services_OpenSearch	0.2.0		Search A9 OpenSearch compatible engines.	
426	pear/Services_OpenStreetMap	0.3.1		OpenStreetMap Services	
427	pear/Services_PageRank	0.1.0		PageRank Lookup (Based on Google Toolbar for Mozilla Firefox)	
428	pear/Services_Pingback	0.2.2		A Pingback User-Agent class.	
429	pear/Services_ProjectHoneyPot	0.6.0		A package to interface the http:bl API of ProjectHoneyPot.org.	
430	pear/Services_ReCaptcha	1.0.3		PHP5 interface to the reCAPTCHA and the reCAPTCHA Mailhide API	
431	pear/Services_Scribd	0.2.0		Interface for Scribd's public API.	
432	pear/Services_SharedBook	0.2.6		PHP wrapper for SharedBook Open API	
433	pear/Services_ShortURL	0.3.1		Abstract PHP5 interface for shortening and expanding short URLs	
434	pear/Services_Technorati	0.7.1beta		A class for interacting with the Technorati API	
435	pear/Services_TinyURL	0.1.2		PHP interface to TinyURL's API	
436	pear/Services_Trackback	0.7.1		Trackback - A generic class for sending and receiving trackbacks.	
437	pear/Services_TwitPic	0.1.0		PHP Interface to TwitPic's API	
438	pear/Services_Twitter	0.6.3		PHP interface to Twitter's API	
439	pear/Services_Twitter_Uploader	0.1.0		OAuth echo uploader utility.	
440	pear/Services_urlTea	0.1.0		PHP interface to urlTea's API	
441	pear/Services_UseKetchup	0.1.0		An API wrapper to the useketchup.com web service.	
442	pear/Services_W3C_CSSValidator	0.2.3		An Object Oriented Interface to the W3C CSS Validator service.	
443	pear/Services_W3C_HTMLValidator	1.0.0		An Object Oriented Interface to the W3C HTML Validator service.	
444	pear/Services_Weather	1.4.7		This class acts as an interface to various online weather-services.	
445	pear/Services_Webservice	0.6.0		Create webservises	
446	pear/Services_Yadis	0.5.1		Implementation of the Yadis Specification 1.0 protocol for PHP5.	
447	pear/Services_Yahoo	0.2.0		Provides access to the Yahoo! Web Services	
448	pear/Services_Yahoo_JP	0.1.1		WebServices for Yahoo!JAPAN	
449	pear/Services_YouTube	0.2.2		PHP Client for YouTube API	
450	pear/SOAP	0.13.0		**Use PHP's in-built SOAP client!** SOAP Client/Server for PHP	
451	pear/SOAP_Interop	0.8.2		SOAP Interop Test Application	
452	pear/Spreadsheet_Excel_Writer	0.9.3		Package for generating Excel spreadsheets	
453	pear/SQL_Parser	0.6.0		An SQL parser	
454	pear/Stream_SHM	1.0.0		Shared Memory Stream	
455	pear/Stream_Var	1.1.0		Allows stream based access to any variable.	
456	pear/Structures_BibTex	1.0.0RC6		Handling of BibTex Data.	
457	pear/Structures_DataGrid	0.9.3		Render a data table with automatic pagination and sorting	
458	pear/Structures_DataGrid_DataSource_Array	0.2.0dev1		DataSource driver using arrays	
459	pear/Structures_DataGrid_DataSource_CSV	0.1.6		DataSource driver using CSV files	
460	pear/Structures_DataGrid_DataSource_DataObject	0.2.2dev1		DataSource driver using PEAR::DB DataObject	
461	pear/Structures_DataGrid_DataSource_DB	0.1.1		DataSource driver using PEAR::DB result objects	
462	pear/Structures_DataGrid_DataSource_DBQuery	0.1.11		DataSource driver using PEAR::DB and an SQL query	
463	pear/Structures_DataGrid_DataSource_DBTable	0.1.7		DataSource driver using PEAR::DB Table	
464	pear/Structures_DataGrid_DataSource_Excel	0.1.2		DataSource driver using Excel spreadsheets	
465	pear/Structures_DataGrid_DataSource_MDB2	0.1.11		DataSource driver using PEAR::MDB2 and an SQL query	
466	pear/Structures_DataGrid_DataSource_PDO	0.2.0		DataSource driver using PHP Data Objects (PDO) and an SQL query	
467	pear/Structures_DataGrid_DataSource_RSS	0.1.1		DataSource driver using RSS files	
468	pear/Structures_DataGrid_DataSource_XML	0.2.1dev1		DataSource driver using XML files	
469	pear/Structures_DataGrid_Renderer_Console	0.1.1		Renderer driver using PEAR::Console_Table	
470	pear/Structures_DataGrid_Renderer_CSV	0.1.5dev1		Renderer driver that generates a CSV string	
471	pear/Structures_DataGrid_Renderer_Flexy	0.1.4		Renderer driver using Flexy	
472	pear/Structures_DataGrid_Renderer_HTMLSortFor	0.1.3		Sorting form renderer for Structures_DataGrid	
473	pear/Structures_DataGrid_Renderer_HTMLTable	0.1.6		Renderer driver using PEAR::HTML_Table	
474	pear/Structures_DataGrid_Renderer_Pager	0.1.3		Renderer driver using PEAR::Pager	
475	pear/Structures_DataGrid_Renderer_Smartyp	0.1.5		Renderer driver using Smarty	
476	pear/Structures_DataGrid_Renderer_XLS	0.1.3		Renderer driver using PEAR::Spreadsheet_Excel_Writer	
477	pear/Structures_DataGrid_Renderer_XML	0.1.4dev1		Renderer driver that generates a XML string	
478	pear/Structures_DataGrid_Renderer_XUL	0.1.3		Renderer driver that generates the XML string for a XUL listbox	
479	pear/Structures_Form	0.8.0devel		A package designed to make creating input forms easy for packages and applications regardless of their user interface.	
480	pear/Structures_Form_Gtk2	0.8.0devel		A collection of elements, groups and renderers for creating PHP-GTK 2 forms using Structures_Form.	
481	pear/Structures_Graph	1.0.4	1.0.4	Graph datastructure manipulation library	
482	pear/Structures_LinkedList	0.2.2		Implements singly and doubly-linked lists	
483	pear/System_Command	1.0.8		PEAR::System_Command is a commandline execution interface.	
484	pear/System_Daemon	1.0.0		Turn PHP scripts into Linux daemons	
485	pear/System_Folders	1.0.5		Location of system folders	
486	pear/System_Launcher	0.6.2		Launch files with associated applications	
487	pear/System_Mount	1.0.1		Mount and unmount devices in fstab	
488	pear/System_ProcWatch	0.4.3		Monitor Processes	
489	pear/System_SharedMemory	0.9.0RC1		common OO-style shared memory API	
490	pear/System_Socket	0.4.1		OO socket API	
491	pear/System_WinDrives	1.0.0		List files drives on windows systems	
492	pear/test			test	
493	pear/Testing_DocTest	0.6.0		A Unit Test framework for writing tests in your php code docstrings.	
494	pear/Testing_FIT	0.2.2		FIT: Framework for Integrated Test	
495	pear/Testing_Selenium	0.4.4		PHP Client for Selenium RC	
496	pear/Text_CAPTCHA	0.5.0		Generation of CAPTCHAs	
497	pear/Text_CAPTCHA_Numeral	1.3.1		Generation of numeral maths captchas	
498	pear/Text_Diff	1.1.1		Engine for performing and rendering text diffs	
499	pear/Text_Figlet	1.0.2		Render text using FIGlet fonts	
500	pear/Text_Highlighter	0.7.3		Syntax highlighting	
501	pear/Text_Huffman	0.2.0		Huffman compression	

No	PACKAGE	LATEST	LOCAL	Description	Check
502	pear/Text_LanguageDetect	0.3.0		Language detection class	
503	pear/Text_Password	1.1.1		Creating passwords with PHP.	
504	pear/Text_PathNavigator	0.2.0		Facilitates navigation of path strings	
505	pear/Text_SpellAudio	0.1.0		Generates a sound clip saying the contents of a string of characters.	
506	pear/Text_Statistics	1.0.1		Compute readability indexes for documents.	
507	pear/Text_TeXHyphen	0.1.0		Automated word hyphenation with the TeX algorithm.	
508	pear/Text_Wiki	1.2.1		Transforms Wiki and BBCode markup into XHTML, LaTeX or plain text markup. This is the base engine for all of the Text_Wiki sub-classes.	
509	pear/Text_Wiki2			A PHP5 port of Text_Wiki.	
510	pear/Text_Wiki_BBCode	0.0.4		BBCode parser for Text_Wiki	
511	pear/Text_Wiki_Cowiki	0.0.2		Cowiki parser and renderer for Text_Wiki	
512	pear/Text_Wiki_Creole	1.0.2		Creole parser and renderer for Text_Wiki	
513	pear/Text_Wiki_Doku	0.0.1		Doku parser and renderer for Text_Wiki	
514	pear/Text_Wiki_Mediawiki	0.2.0		Mediawiki parser for Text_Wiki	
515	pear/Text_Wiki_Tiki	0.1.0		Tiki parser and renderer for Text_Wiki	
516	pear/Translation	1.2.6pl1		Class for creating multilingual websites.	
517	pear/Translation2	2.0.4		Class for multilingual applications management.	
518	pear/Tree	0.3.7		Generic tree management, currently supports databases (via DB, MDB and MDB2) and XML as data sources	
519	pear/UDDI	0.2.4		UDDI for PHP	
520	pear/URI_Template	0.3.3		Parser for URI Templates.	
521	pear/Validate	0.8.5		Validation class	
522	pear/Validate_AR	0.1.2		Validation class for Argentina	
523	pear/Validate_AT	0.5.2		Validation class for AT	
524	pear/Validate_AU	0.1.4		Data validation class for Australia.	
525	pear/Validate_BE	0.1.4		Validation class for Belgium	
526	pear/Validate_CA	0.2.0		Validation class for Canada	
527	pear/Validate_CH	0.6.0		Validation class for CH	
528	pear/Validate_DE	0.5.2		Validation class for DE	
529	pear/Validate_DK	0.2.0		Validation class for Denmark	
530	pear/Validate_ES	0.6.2		Validation class for ES	
531	pear/Validate_FI	1.0.0		Validation class for Finland	
532	pear/Validate_Finance	0.5.6		Validation class for Finance	
533	pear/Validate_Finance_CreditCard	0.5.3		Validation class for Credit Cards	
534	pear/Validate_FR	0.6.0		Validation class for FR	
535	pear/Validate_HU	0.1.1		Validation class for Hungary	
536	pear/Validate_IE	1.1.0a1		Validation class for Ireland	
537	pear/Validate_IN	0.1.1		Validation class for the Republic of India	
538	pear/Validate_IR	0.1.0		Data validation class for Iran.	
539	pear/Validate_IS	0.3.1		Validation class for Iceland	
540	pear/Validate_ISPN	0.6.1		Validation class for ISPN (International Standard Product Numbers)	
541	pear/Validate_IT	0.2.0		Validation class for Italy	
542	pear/Validate_LI	0.1.0		Validation class for Liechtenstein	
543	pear/Validate_LU	0.1.0		Validation class for Luxembourg	
544	pear/Validate_LV	1.0.0RC2		Validation class for Latvia	
545	pear/Validate_NL	0.5.2		Validation class for NL	
546	pear/Validate_NO	0.1.0		Validation class for Norway	
547	pear/Validate_NZ	0.1.6		Validation class for NZ	
548	pear/Validate_PL	0.5.2		Validation class for PL	
549	pear/Validate_ptBR	0.5.5		Validation class for Brazilian Portuguese	
550	pear/Validate_RU			local russian Validate methods	
551	pear/Validate_SE	0.1.1		Validation class for Sweden	
552	pear/Validate_UK	0.5.4		Validation class for UK	
553	pear/Validate_US	0.5.5		Validation class for US	
554	pear/Validate_ZA	0.2.2		Validation class for ZA	
555	pear/Var_Dump	1.0.4		Provides methods for dumping structured information about a variable.	
556	pear/VersionControl_Git	0.4.4		Provides OO interface to handle Git repository	
557	pear/VersionControl_SVN	0.5.1		Simple OO wrapper interface for the Subversion command-line client.	
558	pear/VFS	0.3.0		Virtual File System API	
559	pear/XML_Beautifier	1.2.2		Class to format XML documents.	
560	pear/XML_CSSML	1.1.1		The PEAR::XML_CSSML package provides methods for creating cascading style sheets (CSS) from an XML standard called CSSML.	
561	pear/XML_DTD	0.5.2		Parsing of DTD files and DTD validation of XML files	
562	pear/XML_FastCreate	1.0.4		Fast creation of valid XML with DTD control.	
563	pear/XML_FeedParser	1.0.5		Providing a unified API for handling Atom/RSS	
564	pear/XML_fo2pdf	0.98		Converts a xsl-fo file to pdf/ps/pcl/text/etc with the help of apache-fop	
565	pear/XML_FOAF	0.4.0		Provides the ability to manipulate FOAF RDF/XML	
566	pear/XML_GRDDL	0.2.0		A PHP library for dealing with GRDDL.	
567	pear/XML_HTMLSax	2.1.2		A SAX parser for HTML and other badly formed XML documents	
568	pear/XML_HTMLSax3	3.0.0		A SAX parser for HTML and other badly formed XML documents	
569	pear/XML_image2svg	0.1.1		Image to SVG conversion	
570	pear/XML_Indexing	0.3.6		XML Indexing support	
571	pear/XML_MXML	0.3.0		Framework to build Macromedia Flex applications.	
572	pear/XML_NITF	1.1.1		Parse NITF documents.	
573	pear/XML_Parser	1.3.4	1.3.4	XML parsing class based on PHP's bundled expat	
574	pear/XML_Parser2	0.1.0		PHP5+ version of XML_Parser - an XML parsing class based on PHP's bundled expat	
575	pear/XML_Query2XML	1.7.2		Creates XML data from SQL queries	
576	pear/XML_RDDL	0.9		Class to read RDDL (Resource Directory Description Language) documents.	
577	pear/XML_RPC	1.5.5		PHP implementation of the XML-RPC protocol	
578	pear/XML_RPC2	1.1.1		XML-RPC client/server library	
579	pear/XML_RSS	1.0.2		RSS parser	
580	pear/XML_SaxFilters	0.3.0		A framework for building XML filters using the SAX API	
581	pear/XML_Serializer	0.20.2		Swiss-army knife for reading and writing XML files. Creates XML files from data structures and vice versa.	
582	pear/XML_sql2xml	0.3.4		Returns XML from a SQL-Query.	
583	pear/XML_Statistics	0.2.0		Class to obtain statistical information from an XML documents.	
584	pear/XML_SVG	1.1.0		XML SVG API	
585	pear/XML_svg2image	0.2.0		Converts a svg_file to a png/jpeg image.	
586	pear/XML_Transformer	1.1.2		XML Transformations in PHP	
587	pear/XML_Tree	2.0.0RC3		*** PHP5 now comes with very good XML handling, consider using it if possible. Otherwise, use XML_Serializer *** Represent XML data in a tree structure	
588	pear/XML_Util	1.2.1	1.2.1	XML utility class	
589	pear/XML_Util2	0.1.0		XML utility class	
590	pear/XML_Wddx	1.0.2		Wddx pretty serializer and deserializer	
591	pear/XML_XPath	1.2.4		The PEAR::XML_XPath class provided an XPath/DOM XML manipulation, maneuvering and query interface.	
592	pear/XML_XPath2			The PEAR::XML_XPath2 package provided an XPath/DOM XML manipulation, maneuvering and query interface.	
593	pear/XML_XRD	0.3.0		PHP library to parse and generate "Extensible Resource Descriptor" (XRD + JRD) files	
594	pear/XML_XSLT_Wrapper	0.2.2		Provides a single interface to the different XSLT interface or commands	
595	pear/XML_XUL	0.9.1		Class to build Mozilla XUL applications.
